Making business with media and IT companies in Europe

Joachim Graf
CEO HighText Verlag,
Munich, Germany

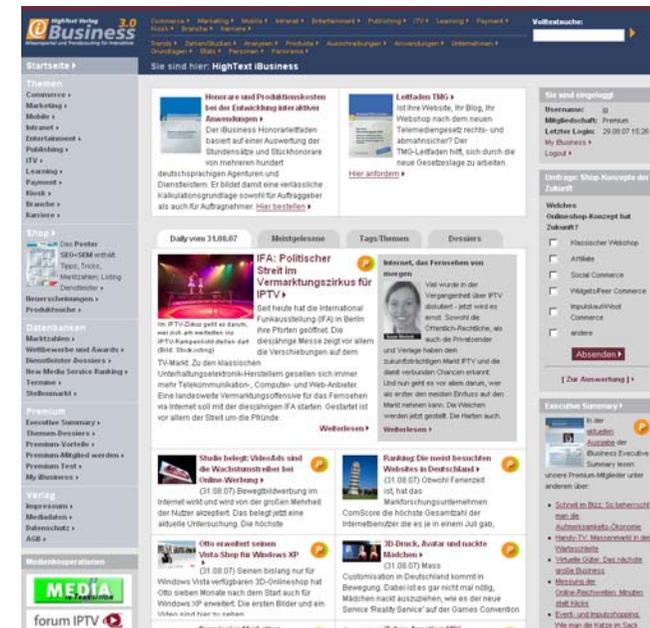

HighText Verlag

@ Since 1991

@ **Trendscouting and consulting** for strategic decision makers in convergent markets

@ iBusiness.de: knowledge data base and **data mining tool** for the interactive industry

@ **Networking tools** and tenders for the industry

Europes IT business is small

 573.000 IT companies

 120.000 media companies

 90% of them are smaller
than 10 employees

Oktoberfest is only once a year.

(and beside this: That is Oktoberfest in Lima, Peru,
shown on www.livingperu.com)

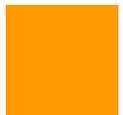

Who are the decision makers?

④ European IT SMEs are often driven by research, technology and science.

④ They are not focussed on marketing and sales

④ The CEO is often the chief engineer, thinking engineerish

④ They focus on facts

The trigger words

@Trust

@Quality

@Time

@(price)

Outsourcing decisions

Prove of knowledge

 In technology, in project management, in line of business

References, references, references

 Prove of ability to work on time and in quality

Where are the decision makers?

@ Focussed conferences and fairs

@ CeBIT, Hannover

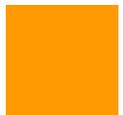

@ Social Networks

Problems with Networking 1.0

- Ⓜ Expensive for Europeans AND Africans.
- Ⓜ No “One stop shopping”
- Ⓜ Time consuming
- Ⓜ Complicated, especially for small companies
 - Ⓜ Who should do it?

Lets switch to Networking 2.0!

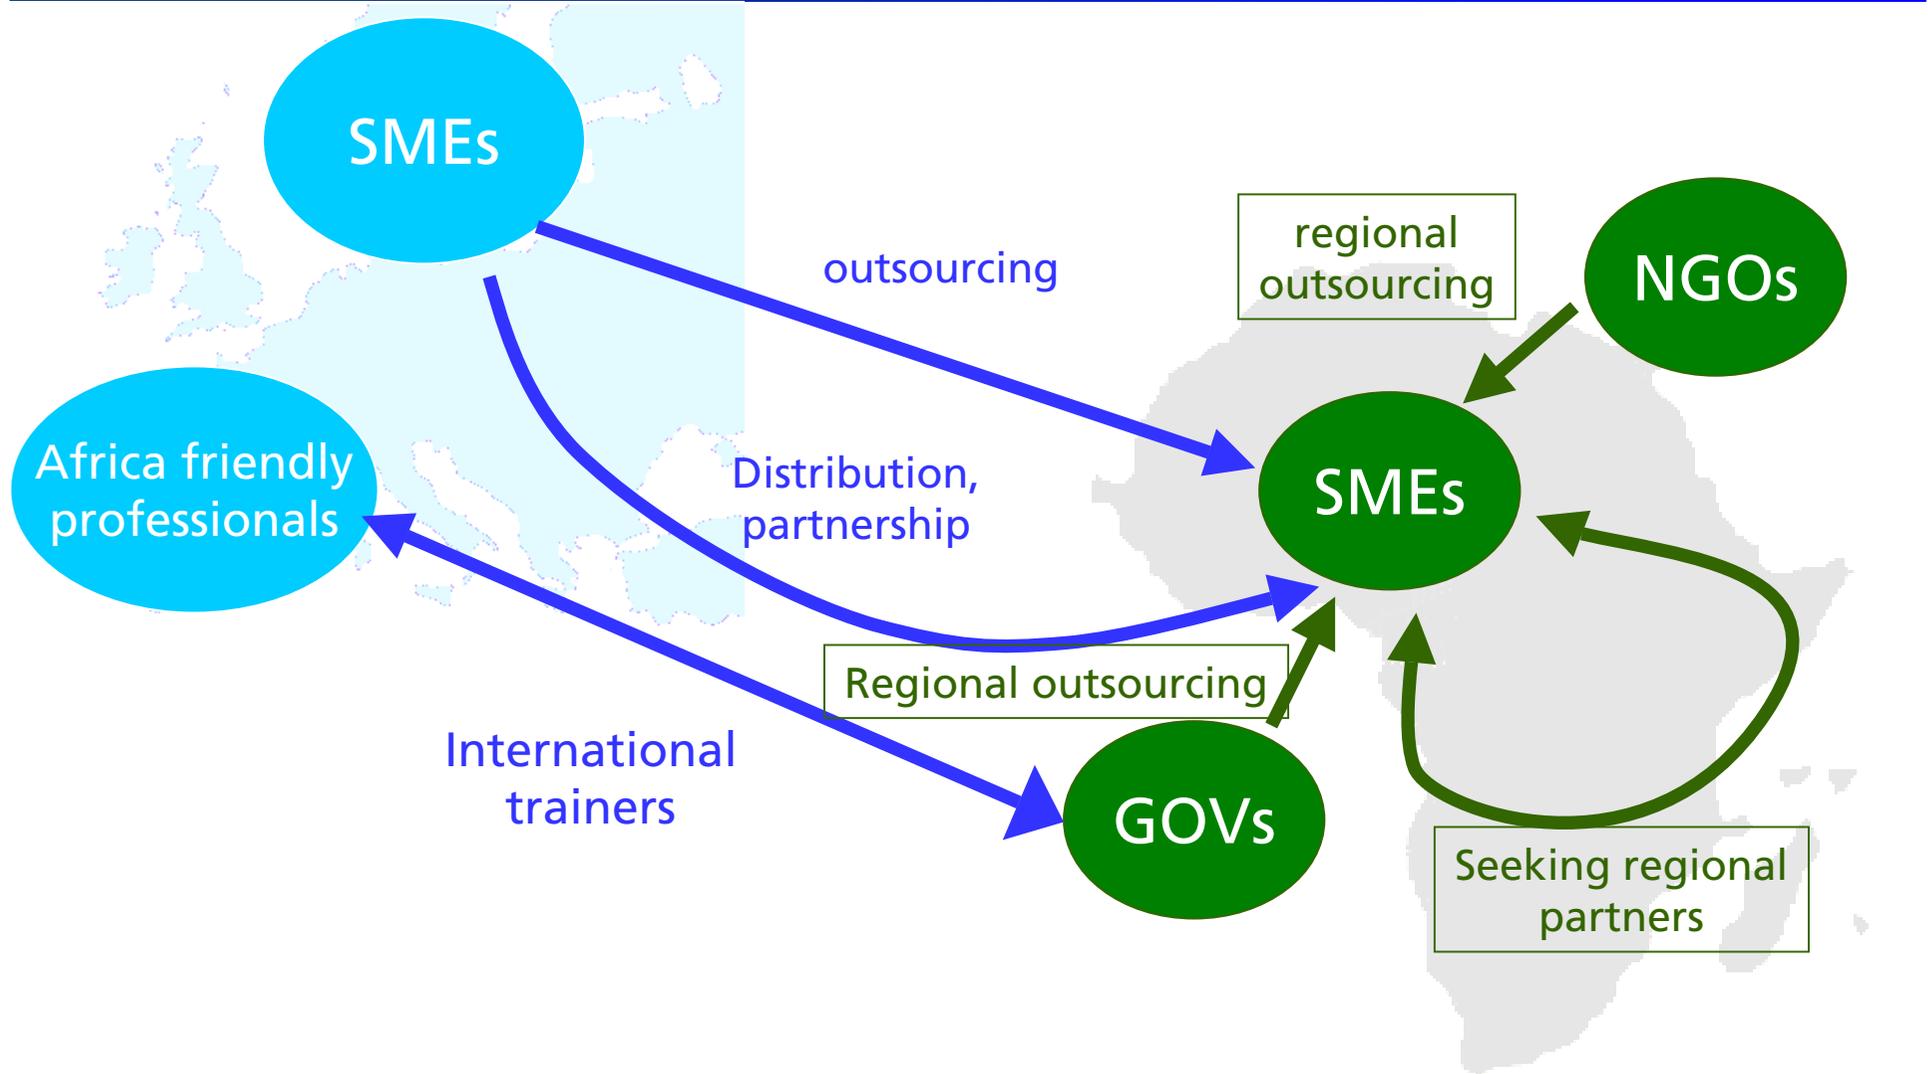

What does this guy want to do?

- ④ Set up a multinational online networking platform
- ④ To connect European and African SMEs
- ④ It should be **OPEN** for every IT and media company and professional
- ④ It should open the **SOURCE AFRICA** for European entrepreneurs, seeking outsourcing and partnership
- ④ And open the Market Europe for African entrepreneurs

The project idea

Why am I here?

- ④ I want to **listen and learn** more about IT in Africa
- ④ I want to find **project partners** in the field of **Open Source software development**
- ④ My E-Mail: joachim.graf@ibusiness.de
- ④ Project Blog:
www.open-source-africa.com
